

## SOCIAL ISSUES

A **social issue** is a problem that influences a considerable number of the individuals within a society. It is often the consequence of factors extending beyond an individual's control, and is the source of a conflicting opinion on the grounds of what is perceived as a morally just personal life or societal order. Social issues are distinguished from economic issues; however, some issues (such as immigration) have both social and economic aspects. There are also issues that don't fall into either category, such as warfare.

There can be disagreements about what social issues are worth solving, or which should take precedence. Different individuals and different societies have different perceptions.
